Mysteries of the moon

Earth's natural satellite, has intrigued and mystified humanity for centuries. It has been a source of wonder, inspiration and even superstition. While we have learned much about the Moon's pull on tides, there is still more to know about its influence on plants and our human physical and emotional body. Aligning some activities and treatments to the Moon, was an ancient practice and has been rediscovered and popularised in recent times for various practical and spiritual reasons.

Find out how you might take advantage of the Moon on its monthly orbit around the Earth.

Finding our authentic self

What is the one thing our Soul is calling us towards right now? We all have a deep desire to understand ourselves and gain a richer awareness vital to uncover the very essence of our birth chart. Lynne will bring a method for us to examine, uncover and integrate our discoveries, allowing us to find Our Soul Calling. This is indicated in our own natal chart. When we allow for our own inner wisdom to shine through, this gives our life a greater sense of meaning and deep purpose.

The sun & moon God & Goddess

Richard will explore how, when and why our general consciousness shifted from the Lunar Goddess to the Solar God, and how this is reflected in Astrology. With the ascendancy of the Feminine and renewed interest in the Goddess Archetype, we shall discuss how civilisation has progressed or regressed. Is the Solar God still appropriate to us today or should we focus more on the Feminine as exemplified by the Lunar Goddess?

We shall be looking at Sacred Sites erected to glorify both Solar and Lunar Deities. Richard will also explain how rocks and crystals hold the Signature in microcosm of the Sun and the Moon and how they can be used in healing.

Richard Giles

Richard has been deeply involved and interested in Astrology for over thirty years. He has spoken on the ABC and Radio. He has written prolifically for numerous magazines including Nexus, and is also a Feng Shui practitioner and Chinese Astrologer.

2024 Chinese Year of the Dragon

The Chinese New Year starts on the 10th February 2024. To the Chinese, Dragons represent power, success, honour, strength and luck. In mythology the Dragon rules over the Skies and also under the Earth, so Dragon energy years are very important, the last one was in 2002. This year it is a Wood Dragon and Wood element rules the East and is associated with Spring. The Colour is green and rules the liver. Dragons are strong characters and so the year ahead is a mix of Wood which is action and words and Earthy solidness with earth shaking events.

The further importance of 2024 is that we will begin a whole new twenty-year cycle ruled by the Chinese number NINE which is Fire Element – Positive activity, artistic energies, spiritual energies and the heart all thrive in the NINE cycle. We can look forward to that!

CHIRON IN ARIES
The healing journey of the Sacred Warrior
With Barbula Clement

Chiron, the Wounded Healer, has been in Aries since 2018 and continues through this sign until 2027. During this extended period we may be facing body issues related to injuries, wounds, blood and the head.

Chiron calls us to address the deeper psychological and soul related issues such as conflict, courage, how we take action, and our willingness to make bold new moves. We are also dealing with all themes related to males and the Masculine Principle itself. In 2023 and through the first half of 2024, the evolutionary North Node is with Chiron, pointing us clearly towards radical healing of this masculine energy.

DESIRE, DENIAL AND THE MAGDALENE CODES

From the early Wisdom Teachings of the Sacred Prostitute and the Divine Feminine, to the ecstatic dance of the swirling Dervishes, buried in your natal chart is the Path to Liberation. From the sexual to the spiritual we spiral upwards to Light. Gerry will invite Mars and Pluto into the arena, and place them in the context of Kundalini and synchronise them with your Chakras and their Axis of the Solstice Planets.

Alchemy distils, cleanses and transforms the aura, releases pent up emotions, kills depression and repels anxiety and Pan-ic attacks. What is this profound yet subtle force of passion latent in your birth chart that can bring such revelations and liberation?
